

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-22. (Canceled).

23. (New) A method of controlling communication routing, comprising:

outputting, on a palmtop computer, a data book alarm to alert a user of a particular appointment;

receiving, on said palmtop computer, an acceptance of said data book alarm;

outputting, on said palmtop computer, a plurality of routing profiles when said user accepts said data book alarm;

receiving, on said palmtop computer, a selected routing profile for said particular appointment; and

outputting, on said palmtop computer, said selected routing profile and information relating to said particular appointment.

24. (New) The method according to Claim 23, wherein said data book alarm comprises an audio alert that it is time for said particular activity.

25. (New) The method according to Claim 23, wherein said data book alarm comprises a visual alert that it is time for said particular activity.

26. (New) The method according to Claim 23, further comprising:

receiving, on a telephone server, said selected routing profiles and said information relating to said particular appointment

directing, on said telephone server, a plurality of calls using active profiles at a time of receipt of each call, wherein said active profiles comprises said selected routing profile and said information relating to said particular activity.

27. (New) The method according to Claim 23, further comprising:

receiving, on said palmtop computer, a new appointment;

outputting, on said palmtop computer, a data entry form to permit said user to establish a routing profile for said new appointment;

outputting, on said palmtop computer, said established routing profile and information relating to said new appointment to said telephone server, and

wherein said active profiles further comprises said established routing profile and said information relating to said new appointment.

28. (New) The method according to Claim 23, wherein each of said plurality of routing profiles comprises a destination phone number.

29. (New) The method according to Claim 28, wherein said destination phone number is selected from a group of phone numbers associated with said user.

30. (New) The method according to Claim 28, wherein one or more of said plurality of routing profiles further comprises a source phone number.
